

SHIVApO

User Guide unplugged Contuction Vaporizer

shivapo.com

open the heating head

take out the insert for a bigger herb chamber and a longer vaporizing session !

shivapo.com

fill the herb chamber with your favorite flowers

shivapo.com

close it

now take your first gentle pull for about 3 to 5 seconds the SHIVApO is aproximately 100 C / 212 F

the second pull about 3 to 5 seconds is 130-150 C / 260-300 F and the third aproximately 170-180 C / 350-360 F

be carefull with the next pulls, now you can easily get into the burn area, because the temperatur is now maybe over 200 C / 400 F best option is a jet lighter but all others make the job to

the same user games apply for SHIVApO TABLE VAPORIZER and the SHIVApO & BONG VAPORIZER ATTACHEMENT
